

Software Quality Assurance & Testing Report

Project Title: SoluoPrint - Premium All-in-One Print Shop Management (Print/Job management, CRM, Financial Management & Analytics Platform, Automated SMS Notifications)

Author: Peter Borngreat-Mensah (Student Index: 22424679)

Course: CSCD 602 - Advanced Software Engineering, Department of Computer Science, University of Ghana.

NOTE: QA Strategy Summary

Comprehensive black-box functional testing, integration verification, security checks, and usability validation performed across all live routes on <https://print.soluotech.com>. The test coverage spans Admin, Customer, and External API interfaces.

1. Executive Test Execution Matrix

Test ID	Module / Journey	Test Description & Expected Outcome	Status	Defects & Corrective Resolution
TC-01	Admin Auth	Attempt login with invalid credentials. System blocks and returns HTTP 401 error.	PASS	Verified. Supabase Auth handles rejection cleanly.
TC-02	Admin Login	Login with valid Admin credentials (pborngreatmensah@gmail.com). Redirects to /dashboard.	PASS	Verified. Dashboard loads stats within 1.2s on live server.
TC-03	Customer Portal Auth	Login via /customer-login with CUST-BENM-8564 / rli9kpvb. Validates against customers table.	PASS	Defect: Hook crash on state. Fix: Reordered useMemo hooks prior to conditional returns.
TC-04	Single Job Creation	Add print job with custom dimensions (W: 4, H: 6 ft). Calculates area and total price.	PASS	Verified. Total price matches square footage calculation.
TC-05	Bulk Job Sticker	Add bulk sticker job. Selecting	PASS	Defect: Unit

	Presets	'Sticker 3x3 in' populates W, H, unit (inch), & price.		stayed 'ft'. Fix: Updated handlePresetSelect to update unit and unit_price atomically.
TC-06	Payment Recording	Record payment against customer balance. Auto-clears balance and updates status to Completed.	PASS	Verified. Balance updates real-time in Supabase DB.
TC-07	SMSOnlineAPI Gateway	Dispatch payment receipt SMS via sms.js. Message strictly follows SMSGH template.	PASS	Verified. smsonlineapi responds with success code.
TC-08	Namecheap SMTP Email	Send email verification via /api/send_email.php using notify@soluotech.com over SSL 465.	PASS	Verified. Custom HTML verification email delivered.
TC-09	Payment Gateway Settings	Configure Hubtel, Paystack, and Flutterwave API keys in settings.	PASS	Verified. Gateway keys stored in settings table.
TC-10	Export Toolbar PDF	Export Revenue Report page to PDF. PDF includes visual canvas graphics and table.	PASS	Defect: Black canvas compositing. Fix: Standardized beforeDraw canvas wiping compositing.
TC-11	Add User to Company	Create a new staff user from User Management. Auto-generate credentials when email/password omitted.	PASS	Defect: toast.error() crash. Fix: Switched to showToast() + added direct profile insert fallback.
TC-12	Customer Portal Job Upload	Customer submits job with artwork files from portal. Files stored via PHP or Supabase Storage fallback.	PASS	Defect: PHP 404 on localhost. Fix: Added Supabase Storage fallback upload path.
TC-13	Customer Online Payment	Customer pays outstanding balance via Paystack/Hubtel/Flutterwave from portal dashboard.	PASS	Verified. Payment updates balance, generates notification, and sends SMS

				receipt.
TC-14	Expanded RBAC Permissions	18 granular permissions across 8 groups control sidebar visibility and route access.	PASS	Verified. Staff sees only permitted views; Owner has full access.
TC-15	Audit & Activity Logging	Logins, job uploads, deletions, user additions, and payments captured in audit_logs with CSV export.	PASS	Verified. System captures real-time audit records across Admin, Staff, and Customer activities.
